Let our software do all the hard work ...

You-Grow understands that your clients such as the Ministry of Defense (MOD) require specific financial reporting.

With our bespoke software comes the benefits of being able to manipulate data to tailor to your client needs.

We have worked closely with clients contracted to the Ministry of Defense who have required detailed monthly breakdowns on contractors margins. You-Grow has written specific AG173 invoice templates for the MOD, allowing our clients to save time & money not having manually manipulate invoice data.

With a couple of clicks, weeks of data can be manipulated onto customised bespoke reports.
